

MAMA Project Event Registration Name:

Date:

Location:

Male	Female	Day of Birth	Month of Birth	Year of Birth	Months completed (<1 yr)	Age in Years completed	& Months if <19 years old	Pregnant?: If YES: Check BP/Hg/BS/UA	Breast Feeding	WEIGHT kg to .1	HEIGHT cm to .1	BMI (Kg÷(m X m))	Oedema Present?	WAZ N M S	HAZ N M S	BAZ N M S	MUAC cm to .1 N M S	Systolic Blood Pressure	Diastolic Blood Pressure	Haemoglobin Colour Estimate N M S	Blood Sugar FASTING? Y/N	Haematuria + ++ +++ ++++	Proteinuria + ++ +++ ++++	Does family drink only boiled or filtered and chlorinated water?	Should mother give baby food or drink besides breast milk before 6 mo?	Is it best for a 6 mo infant to start mashed food rather than porridge?
								Yes / No	Yes / No				Yes / No									Yes / No	Yes / No	Yes / No	Yes / No	Yes / No

Classifying Malnutrition: N=Normal (-2 to +2 Z-Score) M=Moderate (-2 to -3 Z-score) S=Severe (-3 Z-score & below)

- **Acute** or recent malnutrition can cause visible wasting, or thinness, and can be detected by low Mid Upper Arm Circumference (MUAC), Weight for Height in 0-60 months, or BMI for age 5-19 yrs. Malnutrition that results in oedema is automatically classified as severe (Kwashiorkor)
- **Chronic** or long-term malnutrition can be revealed by stunting or failure to grow in height or length for age
- **Underweight** in children 0-10 years can be from either acute or chronic malnutrition, as can anaemia.

Chief Complaint/History/Duration:
Review of Symptoms:

Danger signs- Poor appetite/Unable to eat or drink anything/Cannot swallow/Lethargy/ Weakness/Vomiting everything/Convulsions/Coughing/ Wheezing/Rapid breathing/SOB/Diarrhea/Blood in Stool/Fever/Recent Measles/Itching/Rashes/Headache/ Stiff Neck/Pain/Ear pain/ Ear Discharge

Notes:

Vital Signs: BP: Repeat if over 120/80
T:
P:
R:
Oxygen % saturation:

Physical exam: General Stigmata of malnutrition HEENT Neck Chest Breast Heart Lungs Abdomen GU Skin/Hair Musculoskeletal Neuro / Psyche

IMPRESSIONS: Malnourished Acute Wasting (Moderate /Severe) = MAM SAM Chronic Stunting (Moderate /Severe) = MCM SCM
RECOMMENDATIONS: Nutritional Counseling/Rx:

Circle if given according to protocols: Vitamin A Albendazole Praziquantel # _____ Dentifrice Micronutrients Dietary Supplements Revised 18August2021 PB
